

## ArjoHuntleigh highlights Bariatric Solutions and WoundASSIST

**At Medica in Düsseldorf, November 19-22, ArjoHuntleigh will showcase its integrated product range. With a special focus on Bariatric Care solutions and Wound Therapy and Healing, you can visit our stand to gain an insight on our new products, get the views of a bariatric model and catch up on the WoundASSIST® TNP success story after its first year on the market.**

### Optimum solutions for Bariatric Care

The new *Lourano* transfer chair is the latest addition to the ArjoHuntleigh range of Bariatric Care solutions, which have been developed to meet the specific needs of bariatric patients. Other products in the range include the bariatric bed (*Contoura 1080*) with specially developed *Bari Breeze* mattress and *Carmina*, the most advanced bariatric shower and commode chair available.

At the ArjoHuntleigh stand you can meet Tracey Carr, who has worked as a professional bariatric model since 2002. As well as modelling work, Tracey also participates in talkshows, BBC shows and is getting involved in designing clothes for all sizes.

Tracey tested the *Lourano* transfer chair in spring 2008 and says: "It was interesting to model for the products that could make my day-to-day life easier."

### A successful first year for WoundASSIST

Since its launch at Medica 2007, WoundASSIST® TNP Therapy, has been well received as an effective, easy-to-use wound therapy solution. The system promotes wound healing by the local application of suction across a wound. Find out more at Medica 2008 about the growing bank of positive case studies and the usability and interactivity enhancements made since the launch to make the system even more user-friendly.

Visit the ArjoHuntleigh stand and talk to our specialists not only about Bariatric Care and Wound Healing and Therapy, but also Patient Handling, Medical Beds and DVT prevention. You can also watch our show and listen to professional presentations of our established and new products...

### Product launches:

- The new improved *MaxiMove* is the ideal lifter for busy nursing environments, specially designed for use in a wide range of settings, including intensive care units.
- *Care-O-Line* is a complete, flexible hygiene equipment concept for tailoring the private bathroom to individual needs.
- *Flowtron Trio* is an intermittent pneumatic compression system for DVT prevention, with garments worn on the calf, thigh and foot – three in one.
- *Easy Slides* are simple to-use aids designed to minimize problems associated with application and removal of compression stockings.

### Visit ArjoHuntleigh at Medica 2008, hall 14, stand C 05.
